

The postie's round

The postie's round

Bell Street runs along the beach, so houses are only built on one side of the road. That means the numbers run in one long line, 0 to 30, instead of odd numbers on one side and even numbers on the other like a normal street.

What number comes just BEFORE house 23?

What number comes just AFTER house 17?

What number is BETWEEN house 26 and house 28?

What number is BETWEEN house 11 and house 13?

The postie is walking backwards from 30. What number comes just before 30?

Walking back the other way

The postie has reached house 30 and now turns around to walk back the way they came, past the same houses in reverse.

Walking back, what number is BETWEEN house 22 and house 20?

Walking back, what number is BETWEEN house 30 and house 28?

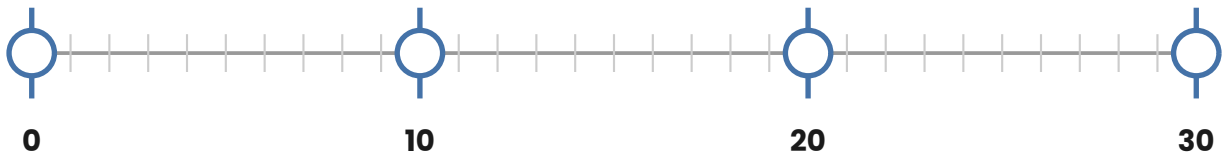

Walking back from house 15, what number comes next?

Walking back, what number is BETWEEN house 9 and house 7?

The car park

The car park

Parking bays are numbered 0 to 30. Use the ticket machine display to help drivers find a space.

A car is parked in bay 19. What bay is directly before it?

Bay 24 is full, and so is bay 26. What bay is between them, still free?

A driver reverses from bay 8 into the bay before it. What bay are they in now?
